Project

Microservices Deployment on AWS (DevOps Project)

- Implemented microservices architecture deployment on AWS using EKS/KOPS and Terraform to provision infrastructure and Kubernetes clusters.
- Designed a 3-tier architecture and automated cluster setup including CNI, Ingress Controller, Metrics Server, OIDC, and Helm.
- Built CI pipelines in Jenkins integrated with GitHub to perform build, testing, and container image creation.
- Implemented security and quality checks using **SonarQube, OWASP, and Trivy** in the CI pipeline.
- Containerized applications using **Docker** and pushed images to **Docker Hub**.
- Automated **CD using Argo CD** to deploy applications across **Dev, Test, UAT, and Production** environments.
- Verified deployments through **AWS ELB DNS** and monitored system performance using **Prometheus and Grafana**.
- Integrated **Slack notifications** for CI/CD pipeline status.
