

METHLESH KUMAR

Cloud & DevOps Engineer

+91-9505592694 | mithleshsingh51438@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Microsoft Certified: Azure Fundamentals (AZ-900) and DevOps & Cloud Engineering fresher with hands-on experience in AWS, Microsoft Azure, Docker, Kubernetes, Jenkins, Terraform, GitOps (Argo CD), and CI/CD automation. Strong foundation in Linux, networking, infrastructure automation, monitoring, and cloud deployment through real-world projects. Seeking an entry-level Cloud/DevOps Engineer role to contribute and grow in a production environment.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (**Azure Virtual Machines, Azure Blob Storage, Azure Active Directory, and Azure Networking**), AWS, GCP Basics

Operating Systems: Linux (Ubuntu), Windows

Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, VPN, IP Addressing, Load Balancing, Virtual Networking

DevOps: Docker, Kubernetes, Jenkins, Git, GitHub, Terraform, Ansible, Argo CD

Monitoring: Prometheus, Grafana, Node Exporter

Security: SonarQube, Trivy, OWASP Dependency Check

PROJECTS

Microservices Deployment on AWS | GitOps CI/CD Pipeline

Tools: Terraform, Jenkins, Docker, Kubernetes, Argo CD, Prometheus, Grafana, SonarQube, OWASP, Trivy, AWS

- Built Jenkins CI pipelines for automated build, test, and Docker image creation from GitHub commits.
- Containerized and deployed microservices on Kubernetes; configured Argo CD for GitOps-based continuous deployment.
- Integrated SonarQube, OWASP Dependency Check, and Trivy for automated code quality and security scanning.
- Provisioned AWS infrastructure using Terraform for repeatable, automated deployments.
- Monitored cluster and application health using Prometheus, Grafana, and Node Exporter.

CI/CD Pipeline using Jenkins, AWS S3 & Tomcat

Tools: Jenkins, AWS (EC2, S3, IAM), Apache Maven, Apache Tomcat, Git, GitHub | Repo: github.com/methleshsingh99/jenkins-cicd-tomcat-deployment

- Designed a 4-stage Jenkins pipeline: build, test, artifact upload to Amazon S3, and deployment to Tomcat on EC2.
- Automated the full workflow from GitHub commit to live deployment, cutting manual deployment effort and improving deployment speed.
- Configured IAM roles and S3 bucket policies for secure artifact storage; resolved port conflicts, service restarts, and permission errors.

WORK EXPERIENCE

Apprentice Trainee – Technical (Network Operations) Feb 2021 – Nov 2022

ECIL – Electronics Corporation of India Limited, Hyderabad

- Monitored network infrastructure to maintain availability of IP-based systems.
- Diagnosed and resolved network connectivity, routing, and switching issues, reducing operational downtime.
- Collaborated with technical teams to troubleshoot production incidents and maintain network stability.
- Maintained technical documentation and supported daily operational activities.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft (July 2026)

EDUCATION

B.Tech in Computer Science & Engineering — Malla Reddy Institute of Engineering & Technology, JNTUH Hyderabad
2025 | CGPA: 7.45

Diploma in Computer Engineering — TRR College of Engineering, SBTET Telangana
2019 | 70.12%
