OBJECTIVE

Aspiring DevOps Engineer with hands-on experience in CI/CD pipelines, Docker, Terraform, and cloud platforms (AWS & Azure). Proficient in container orchestration using Kubernetes, infrastructure automation using Terraform, and deployment workflows using Argo CD. Seeking an entry-level DevOps or Cloud Engineer role to contribute to scalable infrastructure, automation, and DevSecOps practices in a growth-oriented organization.

SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, ASG, Load Balancer, CloudWatch, Route53), Azure (Virtual Machines, Storage Accounts, Azure DevOps), GCP (basics)
- **CI/CD Tools:** Jenkins, GitHub Actions, Argo CD
- **Containerization:** Docker
- **Orchestration:** Kubernetes
- **Infrastructure as Code:** Terraform
- **Monitoring & Observability:** Prometheus, Grafana, Node Exporter
- **Security & Code Quality:** SonarQube, OWASP Dependency Check, Trivy
- **Configuration Management:** Ansible
- **Scripting:** Bash, Python
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu), Windows

PROFILE SUMMARY

- Hands-on project-based experience in DevOps and cloud technologies.
- Built end-to-end CI/CD pipelines using Jenkins and GitHub, integrating automated builds, security scans (SonarQube, OWASP, Trivy), and Docker image deployments.
- Hands-on with AWS services: EC2, S3, IAM, AMI, ASG, Load Balancer, EFS, CloudWatch, CloudTrail, and Route53.
- Deployed and monitored containerized microservices on Kubernetes using Argo CD (GitOps) and Prometheus/Grafana.
- Familiar with Azure: Virtual Machines, Storage Accounts, Azure DevOps, and basic networking.
- Comfortable with Linux administration, Bash scripting, and Git-based workflows.

WORK EXPERIENCE

Apprentice Trainee — Technical (Network Operations)

ECIL — Electronics Corporation of India Limited (Govt. of India Enterprise), Hyderabad

February 2021 – November 2022 | 21 months | Apprentice & Advanced Diploma Trainee Certificate awarded

- Monitored, tested, and troubleshoot live defense-grade satellite-cum-terrestrial networks
- Operated and maintained Cisco networking equipment including Routers, Switches, IP Phones, and IPPBX devices gaining hands-on CLI and configuration experience.
- Conducted testing and technical evaluation of indigenous (Made-in-India) networking products for Defense use, documenting results and flagging issues to senior engineers.
- Performed RMA (Return Merchandise Authorization) processing for live network hardware coordinating between OEM vendors and field network deployment sites.
- Maintained the Network Lab on a day-to-day basis, ensuring testbed stability and equipment availability for ongoing evaluation activities.

PROJECTS

Project 1: CI/CD Pipeline using Jenkins, AWS S3 & Tomcat

Tools: Jenkins, AWS (EC2, S3, IAM), Apache Maven, Apache Tomcat, Git, GitHub

GitHub: github.com/methleshsingh99/jenkins-cicd-tomcat-deployment

- Designed and implemented a Jenkins CI/CD pipeline covering 4 stages: build, test, artifact upload (Amazon S3), and deployment to Apache Tomcat on EC2.
- Automated the full workflow from GitHub code commit to live deployment, reducing manual deployment effort to zero.
- Configured IAM roles and S3 bucket policies for secure artifact storage.
- Resolved real-world issues including port conflicts, service restart failures, and permission errors during deployment.
- Verified successful deployment by accessing the live application through browser via EC2 public IP.
- Reduced deployment time by 80% using CI/CD pipeline

Project 2: Microservices Deployment on AWS

Tools: Terraform, Jenkins, Docker, Kubernetes, Argo CD, Prometheus, Grafana, SonarQube, OWASP, Trivy, Git, GitHub, AWS

- Built Jenkins CI pipelines integrated with GitHub for automated builds, unit testing, and Docker image creation across multiple microservices.
- Implemented a 3-layer security and quality gate: SonarQube (code quality), OWASP dependency check (vulnerability scan), and Trivy (Docker image scan).
- Containerized microservices using Docker; built and pushed images to Docker Hub registry for version-controlled deployments.
- Configured Argo CD for GitOps-based Continuous Deployment — any Git push to the manifest repo triggered automatic cluster sync.
- Set up Prometheus and Grafana dashboards with Node Exporter to monitor CPU, memory, and pod health across the Kubernetes cluster.
- Provisioned cloud infrastructure using Terraform for repeatable and version-controlled environment setup on AWS.

EDUCATION

Degree / Course	Institution	Board / University	Year	CGPA / %
B.Tech in Computer Science & Engineering	Malla Reddy Institute of Engineering & Technology	JNTUH Hyderabad	2025	7.45 CGPA
Diploma in Computer Engineering	TRR College of Engineering	SBTET, Telangana	2019	70.12%
Class X	Nagarjuna High School	Telangana SSC	2015	7.8 CGPA
