Project

Microservices Deployment on AWS (DevOps Project)

- Implemented microservices architecture deployment on AWS using EKS/KOPS and Terraform to provision infrastructure and Kubernetes clusters.
- Designed a 3-tier architecture and automated cluster setup including CNI, Ingress Controller, Metrics Server, OIDC, and Helm.
- Built CI pipelines in Jenkins integrated with GitHub to perform build, testing, and container image creation.
- Implemented security and quality checks using SonarQube, OWASP, and Trivy in the CI pipeline.
- Containerized applications using Docker and pushed images to Docker Hub.
- Automated CD using Argo CD to deploy applications.
- Monitored system performance using Prometheus and Grafana.
